

BARBOW

OUTDOOR FIREPLACE

DESIGNED AND MADE IN GREAT BRITAIN

Redefining the outdoor flame.

Experience the beauty of unrivaled quality
combined with obsessive engineering, built for life.

A Pingewood will serve you all year round and last
you a lifetime – proudly designed, manufactured &
hand-assembled in the Great Britain

A handwritten signature in black ink, consisting of a series of connected, fluid strokes that form a cursive-like name.

Barbow is a functional artwork designed to bring beauty and warmth to your outdoor space.

The perfect blend of form and function, Air Vortex Technology™ minimises smoke spillage, while maximising the mesmerising effect of the flames.

With its handcrafted good looks and superior British build quality, the Barbow promises to be ready to ignite, season after season. Striking enough to hold its own against any piece of garden sculpture, the Barbow's majestic presence means it adds interest and style to your garden even when not in use.

Its clever three-sided opening means the Barbow radiates heat across a wider radius. And its generous proportions make it possible to accommodate substantial logs of up to 50cm for a large heat output.

Pre-assembled and ready to use as soon as it's unpacked, the Barbow comes in two finishes: Black and pre-weathered Corten, a hard-wearing oxidised steel, boasting a glowing rust patina.

**A design that contributes to
defining your outdoor space.**

Why Barbow?

Durable Paint

Italian paint, corrosion-resistant powder coating preserves beauty in extreme conditions. (Black only).

No Assembly

Ready to ignite straight out of the box.

Air Vortex Technology™

Meticulously designed to minimise smoke spillage and prevent that lingering bonfire smell.

Raised Fire Opening

Ideal flame height for comfort, improved heat output, and efficient easy fuelling.

Expansive Burn Chamber

Powerful heat output for cosy ambiance, ideal for gatherings, maximised heating.

Quality Materials

Solid, enduring fire for all seasons, saving you from frequent replacements.

Over 2 Metres Tall

Sitting just above gazebo height, smoke and debris is effectively redirected, avoiding irritation and unpleasant odours.

Pre-weathered

Instantly relish the beautiful patina, no months of waiting required. (Corten only).

Moulded Eco Fuel Bed

Efficiently burn with high heat, easy ash removal and a harmonising campfire flame.

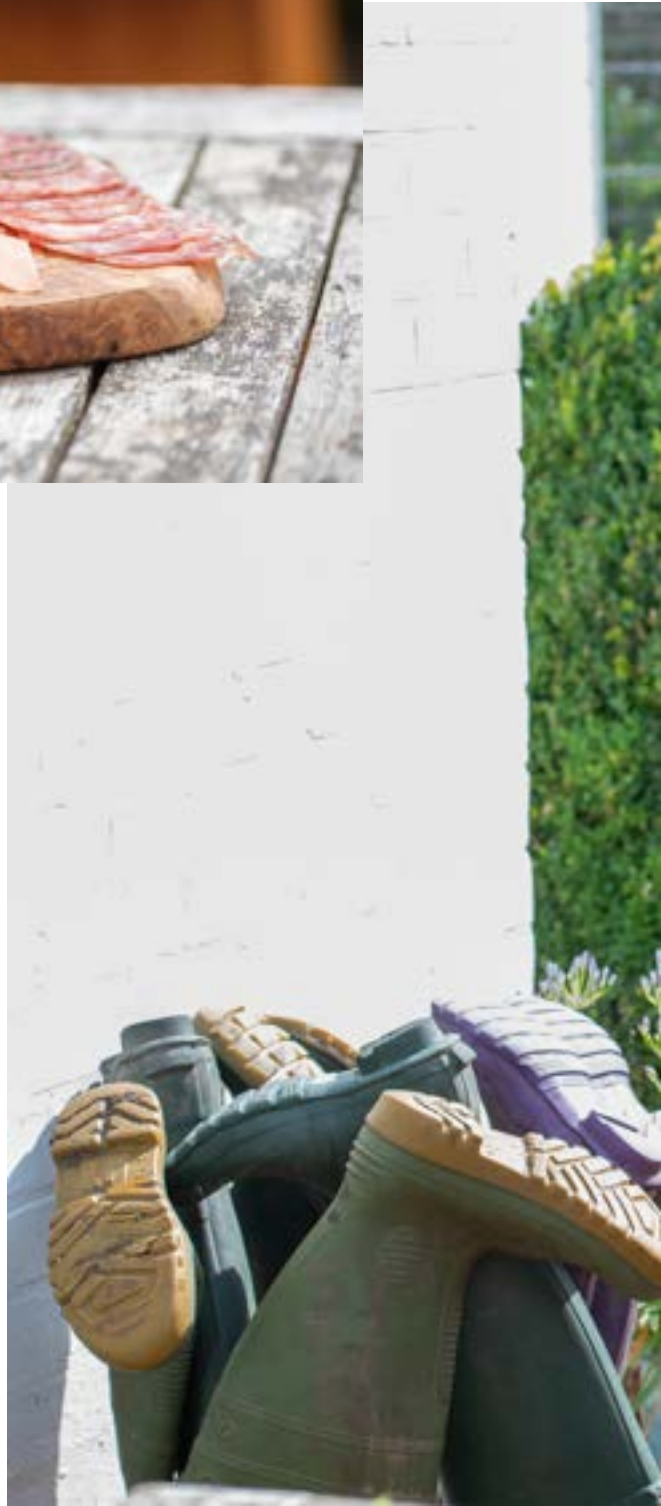

Made in Great Britain

Handcrafted by quality craftsmen, upholding moral values and minimising our carbon footprint.

The iconic smokeless burn*

Fed up of dodging smoke, your clothes and hair smelling for days on end? Designed over three years, our signature **Air Vortex Technology™** has been developed to reduce smoke spillage to a minimum so a fuller and longer fire can be enjoyed.

*Reduces smoke spillage – even in windy conditions.

SCAN ME

Corten

FINISH

 Up to 50 cm  280mm (11")

Corten steel naturally oxidises overtime to create a desirable rust patina finish. Corten protects and heals itself from all outdoor environments for a solid and long lasting outdoor fire.

SIZE 210

Over two metres tall, the optimised chimney height increases draw for an efficient burn and campfire flame effect. Effectively, moving smoke and debris up and away from the area to reduce the lingering smell from a fire.

Standing proud.

Unmatched performance.

Reaching temperatures over 400°C, burn efficiently with increased heat performance using the eco moulded fuel bed. Benefit from a raised opening height for an optimal viewing experience and an expansive chamber so you can ramp the heat up. Easy to clean and maintain.

SCAN ME

Black

FINISH

 Up to 50 cm  280mm (11")

Provides corrosion protection and appearance integrity for high temperatures. Italian black powder coat with great depth and texture.

SIZE 210

Whatever the occasion, fire up the Barbow in all seasons. Ready to ignite year after year, thanks to a robust design, solid construction, and quality materials.

Built for life.

A misty forest with tall, thin trees and a gravel path in the foreground. The trees are mostly bare, suggesting a late autumn or winter setting. The mist is thick, creating a soft, ethereal atmosphere. The gravel path is in the lower left corner, leading into the forest.

We think green. For future generations.

Building quality products that are made to last
with a low carbon footprint. We fix and repair.
This is the ethos of Pingewood.

We're proud to stand behind our products...

Quality craftsmanship combined with clever engineering is the core of everything we do at Pingewood.

Built to last, renowned for exceptional detail, design, and unrivalled performance, thanks to ongoing collaborations with specialists in the combustion industry.

We honour a one-year warranty as standard, and we'll extend that to a five-year warranty when you register your fire with us.

Meticulously designed, manufactured, and hand-assembled in the UK.

How can you benefit from this extended guarantee?

Register your warranty guarantee via your local dealer or online at pingewood.com/warranty using your serial number and date code on the plaque.

All Pingewoods are made to burn wood with a moisture content of less than 20%.

The Corten finish may obtain scratches or abrasions, especially in raw form. It will naturally heal over months as the surface oxidises further and is covered with a thicker layer of patina rust.

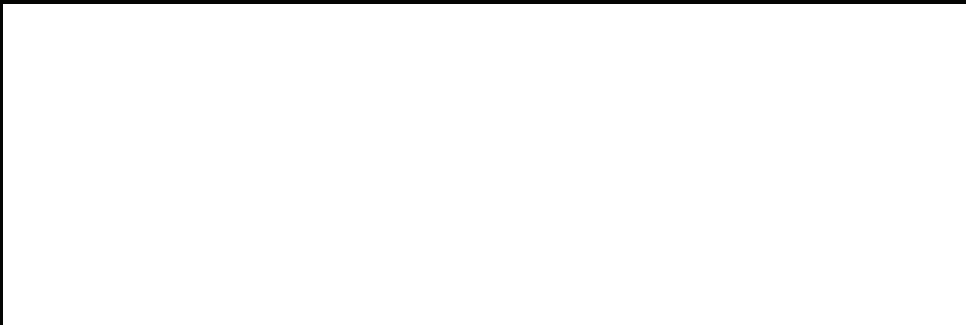

Black paint finish may change colour over time.

*Reduces smoke spillage – even in windy conditions.
